

Kaagazz
Privacy by Design

DOCUMENT PROTECTION AND CONTROL

Kaagazz Secure

**Protect what matters. Control who can access it.
Preserve what happened.**

Kaagazz Secure helps organisations govern sensitive documents through access control, usage restrictions and evidence across the document lifecycle.

THE OPERATING CHALLENGE

- Sensitive documents shared beyond their intended audience
- Limited control after a document is distributed
- Insufficient evidence of access and document activity

Discover - Secure - Govern - Comply

Kaagazz is designed as a connected information-governance platform. Each product addresses a focused need while supporting a wider privacy-by-design journey.

Core capabilities

Access control	Allow authorised users to access protected information.
Usage policies	Apply controls aligned to the document and business context.
Evidence	Retain meaningful records of relevant document activity.
Lifecycle governance	Support protection from controlled access through later review.

What this can help achieve

- Stronger control over sensitive documents
- Reduced dependence on informal sharing practices
- Clearer accountability for document access
- Operational support for privacy and security programmes

A practical starting point

Begin with a high-value document workflow that needs stronger control and traceability.
